

Hop on the biosecurity bandwagon

Ensure you're not spreading pests and diseases
when out harvesting kangaroos

LOOK

CHECK

ASK A VET

Call the emergency animal disease watch hotline if you suspect anything unusual in the kangaroos you are harvesting or the properties you are visiting.

Whether you harvest or farm animals; biosecurity makes good business sense for all producers and harvesters. For information about developing a biosecurity plan visit farmbiosecurity.com.au/new-emerging
