

Pig biosecurity management plan: Template

Creating and implementing a Biosecurity Plan will help protect your pigs from the threat of pests, weeds and diseases. Common pest and disease entry pathways for your pigs include:

If you notice unusual disease symptoms, abnormal behaviour, unexpected deaths or suspect an emergency animal disease in your pigs, immediately call your veterinarian, stock inspector or the **Emergency Animal Disease Watch Hotline** on **1800 675 888**.

EMERGENCY ANIMAL
DISEASE WATCH HOTLINE
1800 675 888

Pig Biosecurity Management Plan (Pig BMP)

Step 1 – Complete the **Enterprise Details** section

Step 2 – Complete the **Pig Biosecurity Management Plan template** with a Y, N or NA. This will help you understand your current level of biosecurity.

“Y” responses	“N” responses	N/A
Meet basic biosecurity practices, no action required	Your measures could be improved	Does not apply to your production system or site

N/A items are those that do not fit within your current production system, for example, if you have a closed herd, any question relating to the introduction of live pigs to your property would be “N/A”. Should your operations model change in the future, these biosecurity items may need to be considered.

Step 3 – Describe the activities you currently undertake for each biosecurity item in the right-hand column of the template.

Do you need help?

A **Biosecurity Management Planning Guide** is available to assist you in developing your biosecurity management plan. The guide provides:

- reasoning on why each biosecurity “item” has been included in the biosecurity management plan template, and
- a description or list of activities, documents or processes that could be followed to adequately meet the requirement.

It is included to provide support and additional details about pig keeping requirements, biosecurity and pig health management. *Choose only those that apply to you and your circumstances where applicable.*

Glossary:

Biosecurity Management Plan is a document that outlines the measures put in place to protect biosecurity and mitigate the risks of pests and diseases on your property.

Biosecurity Management Area is the part, parts of, or whole area of a place to which the biosecurity management plan may apply. In practice, the management area could be your whole property, or a part of your property (e.g. a particular shed, paddock, or other facility). The management area should be clearly defined - preferably with maps - in your biosecurity management plan.

Clean Areas or Zones are where pigs are housed or handled, and access is restricted.

Dirty Areas or Zones are those that surround the ‘CLEAN’ areas with free movement of people, vehicles and machinery. Dirty areas have the potential to be contaminated with pathogens to be kept out of pig areas.

Controlled Entry Point is a visually defined entry point through which all traffic (such as workers, visitors, equipment and vehicles) enters clean area.

Prohibited Pig Feed or Swill includes meat, bone, blood, offal, hide from a mammal or anything that comes into contact with these. You must not feed or allow any pigs access to:

- meat (raw, cooked or processed), bone, blood, offal or hides
- food or table scraps that contain meat, meat products or have been in contact with meat or any of these
- household, commercial and industrial food wastes include restaurant food and discarded cooking oils
- illegally imported dairy products
- anything that has been in contact with these through collection, storage or transport particularly contaminated bins or containers such as take – away food containers
- mammalian carcasses

Restricted Animal Material (RAM) includes a wider range of animal material, and includes all vertebrate animal material from mammals, fish and birds such as meat, fish, feather, bone or blood meal, eggs, pet foods. Gelatine, milk and milk products, and tallows including cooking oils that have been treated to comply with a specified standard are exempt from the ban. You must not feed any vertebrate animal material to ruminants, which includes cattle, sheep, goats, deer, camels and camelids (alpacas). This also means you must prevent access to vertebrate animal material by ruminants unless it is not reasonable or practical (for example, stock licking each other, cow eating its placenta)

Records may be kept as hard copies or digitally e.g., photographs (of vehicle registrations, documents, feed bags, sick pigs etc.), using an app that stamps on date and time. Example template – See www.farmbiosecurity.com.au/pig-biosecurity-management-resources

Biosecurity Plan for a Pig Owner

Plan completed/updated by (name and role): _____

Date of development/review: _____

Enterprise Details			
Pig owner's name		Manager	
Farm/Business name		PIC/s	
Address			
Veterinarian*		Pig tattoos/brands	
Government vet*		PigPass registration #	
Emergency Animal Disease Watch Hotline – 1800 675 888			
Reason for keeping or producing pigs (select your primary reason)	<input type="checkbox"/> Commercial	<input type="checkbox"/> Home consumption	Pig housing (Tick all that apply)
	<input type="checkbox"/> Rescue	<input type="checkbox"/> Farm stay	
	<input type="checkbox"/> Hobby farm	<input type="checkbox"/> Education	
	<input type="checkbox"/> Other:		
Pig inventory (pig numbers)	Sows		Other livestock on property (Tick all that apply)
	Boars		
	Growing pigs		
			<input type="checkbox"/> Indoor (pens, sheds)
			<input type="checkbox"/> Indoor (ecoshelters)
			<input type="checkbox"/> Outdoor (paddock or hut with a run)
			<input type="checkbox"/> Cattle
			<input type="checkbox"/> Sheep/Goats
			<input type="checkbox"/> Poultry
			<input type="checkbox"/> Other (list)

* name and contact if applicable.

Farm Plan:

Develop a farm plan for visitors and farm workers showing key infrastructure (sheds, fences, feed and water facilities), clean and dirty areas, access and exit points, fences, water points etc.

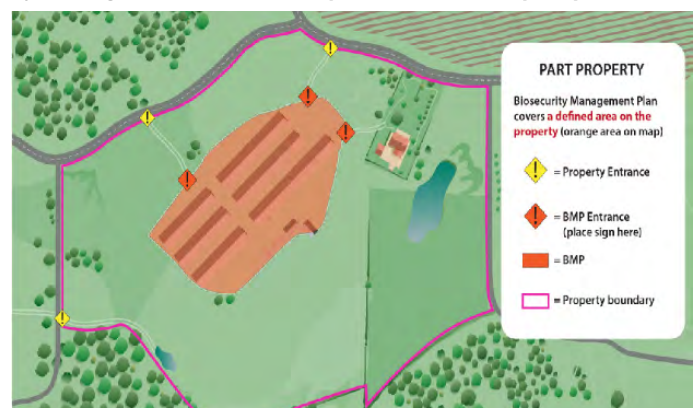

Example Farm Plan or Map

The following maps provide examples where a) a biosecurity management plan covers the whole property and b) a biosecurity management plan covers a defined area within the property e.g. a piggery.

a) Management Area Example – Whole Property

b) Management Area Example – Part of Property

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
1.0 Pig Health				
1.1 Monitor the health and welfare of your pigs daily?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
1.2 Have procedures in place for incoming pigs to ensure they do not introduce disease?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: Select the source of incoming pigs (purchase or otherwise): <input type="checkbox"/> Online sales/auction stud stock <input type="checkbox"/> Saleyard/auction stud stock <input type="checkbox"/> Quality assured breeder <input type="checkbox"/> Other pig owner
1.3 Have procedures in place for incoming semen to ensure it does not introduce disease?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <input type="checkbox"/> Buying from quality assured suppliers <input type="checkbox"/> Other – describe

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
1.4 Identify and isolate (where possible) sick pigs from the main group?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <input type="checkbox"/> Identify and treat in pen <input type="checkbox"/> Move to a designated sick pen and treat <input type="checkbox"/> Other – describe
1.5 Seek veterinary assistance for any sick animals?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <input type="checkbox"/> Having an on-going relationship with a veterinary practice <input type="checkbox"/> Other – describe
1.6 House all pigs in pens/sheds or separate paddocks to other livestock on the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
1.7 Keep records of vaccinations and treatments for your pigs? Example template	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>The following details are recorded:</i> <input type="checkbox"/> Date <input type="checkbox"/> Pen number (if applicable), <input type="checkbox"/> Pig identification or number of pig/s treated <input type="checkbox"/> Pig weight <input type="checkbox"/> Treatment or vaccination given, dose, WHP or ESI information <input type="checkbox"/> Reason for administering and response to treatment
1.8 Record deaths and illness and injury events, including their suspected cause? Example template	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>The following details are recorded:</i> <input type="checkbox"/> Date <input type="checkbox"/> Number of pig/s <input type="checkbox"/> Pig identification (if applicable) <input type="checkbox"/> Age/weight <input type="checkbox"/> Reason (or suspected reason) for death

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
2.0 Pig Feed				
2.1 And everyone who feeds your pigs understands what prohibited pig feed (SWILL) is?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The source of information I/we use is: I/we display this information in the following location/s:
2.2 And everyone who feeds your pigs know not to feed prohibited pig feed (SWILL) to the pigs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The person/s who feeds the pigs daily is: If they are away the pigs are fed by:
2.3 And everyone who feeds your pigs understand what restricted animal material (RAM) is?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The source of information I/we use is: I/we display this information in the following location/s:
2.4 And everyone who feeds your pigs know not to feed pig feed and RAM to ruminants (e.g. cattle, sheep, goats, deer) as well?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we make sure ruminants cannot access pig feed and RAM by:
2.5 Have procedures in place to ensure clean and fresh drinking water is available?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:

<p>2.6 Restrict access of all livestock to carcasses, on-farm disposal sites and stock feed waste?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>I/we do this by:</p>
<p>2.7 Inspect pig feed on delivery/prior to feeding to pigs to ensure it is free from pests, damage and other visual contaminants?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>I/we do this by:</p>
<p>2.8 Buy pig feed or feed ingredients from a FeedSafe accredited supplier OR obtain a commodity vendor declaration that addresses biosecurity?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>Select all feed types provided to your pigs</p> <ul style="list-style-type: none"> <input type="checkbox"/> Purchased feed pellets/mash or pre-mix <input type="checkbox"/> Purchased protein meals and additives <input type="checkbox"/> Purchased grain <input type="checkbox"/> Own grain <input type="checkbox"/> Commercial by-products <input type="checkbox"/> Fruit and vegetables <input type="checkbox"/> Other (please list) <p>For feed or feed ingredients that I purchase, I:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Use a FeedSafe accredited supplier <input type="checkbox"/> Obtain a commodity vendor declaration <input type="checkbox"/> Other - describe
<p>2.9 Keep records of feed fed to your pigs?</p> <p>Keep records of incoming feed?</p>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<p>The following information is kept:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Date <input type="checkbox"/> Type of feed received <input type="checkbox"/> Supplier

Do you		Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
3.0 Controlled Entry					
3.1	Have biosecurity signage at all entry points to the piggery (or pig areas)? <i>See below for link to state regulated sign templates</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Signs I/we have displayed, and their locations are? <input type="checkbox"/> The sign is compliant with state regulations
State regulated biosecurity gate sign templates: Queensland: www.daf.qld.gov.au/onfarmbiosecurity/farm-biosecurity-planning New South Wales: www.dpi.nsw.gov.au/biosecurity/your-role-in-biosecurity/primary-producers/biosecurity-management-plan Victoria, South Australia, Western Australia and Tasmania: www.farmbiosecurity.com.au/toolkit/gate-signs/					
3.2	Have clean and dirty areas / zones in the biosecurity management area (production areas)? <i>Make sure these are included on your farm map</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
3.3	Control entry access to your piggery and pigs by visitors?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
3.4	Ask your visitors about contact with pigs and other animals in the previous 48 hours before coming to your piggery / property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/> A visitor's book is kept up to date <input type="checkbox"/> Other – describe
3.5	Ask your visitors if they have returned from overseas travel in the past 7 days and where they were?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/> Last overseas travel recorded in visitor's book <input type="checkbox"/> Other – describe

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
3.6 Have controlled entry points clearly signed in pig areas (where you change boots or wash hands)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
3.7 Ensure vehicles, drivers and equipment do not access pig production areas without approval?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
3.8 Exclude feral pigs, pests and other livestock from your pigs / piggery?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <ul style="list-style-type: none"> <input type="checkbox"/> Having the area securely fenced <input type="checkbox"/> Baiting/trapping/hunting feral pigs on our property <input type="checkbox"/> Other – describe
3.9 Manage or minimise feral animal and pest attractants on farm, such as farm disposal sites, carcass disposal areas or stock feed waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <ul style="list-style-type: none"> <input type="checkbox"/> Farm disposal sites are securely fenced <input type="checkbox"/> Carcass disposal areas are securely fenced <input type="checkbox"/> Access to feed wastage/spillage is controlled <input type="checkbox"/> Other – describe
3.10 Monitor the presence and concentration of mosquitoes in and around piggery areas Example template	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <ul style="list-style-type: none"> <input type="checkbox"/> Visually inspecting water bodies (including storage containers, effluent ponds, dams, pooled water, troughs, wallows, etc) for presence of wrigglers <input type="checkbox"/> Visually inspecting pigs and facilities at dusk and dawn for resting adult mosquitoes (e.g. ceilings, walls, pig huts and shelters) <input type="checkbox"/> Engaging a professional to assist monitoring <input type="checkbox"/> Trapping <input type="checkbox"/> Other – describe

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
<p>3.11 Manage mosquitoes using non-chemical measures?</p> <p>Refer to Controlling mosquitoes around piggeries</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>I/we do non-chemical vector control by:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Removing anything in the open that is filled with water or has the potential to hold water <input type="checkbox"/> Filling potholes or other areas around the piggery that collect water <input type="checkbox"/> Ensuring gutters, downpipes, and drains around buildings are free of debris and trimming overhanging branches <input type="checkbox"/> Ensuring effluent drainage is free flowing, flushed regularly and does not pool <input type="checkbox"/> Ensuring all tanks, wells or other large water containers are sealed, or screened with 1mm mesh <input type="checkbox"/> Reducing vegetation around the piggery <input type="checkbox"/> Other – describe
<p>3.12 Control mosquitoes using chemical control (when and where required)?</p> <p>Refer to Controlling mosquitoes around piggeries</p> <p>Example records template</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>When using chemical controls for mosquitoes I/we:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Only apply chemicals that are registered for use on pigs - to pigs, pig feed, surfaces that pigs may contact <input type="checkbox"/> Only use chemicals approved for use against mosquitoes and strictly follow the directions for use on the label <input type="checkbox"/> Ensure chemical use for mosquito control is conducted by people authorised to use chemicals <input type="checkbox"/> Apply chemical control to water sources, the outside of sheds and buildings, effluent ponds, staff facilities and pigs <input type="checkbox"/> Restrict chemical use only to areas required to be treated <input type="checkbox"/> Keep records of all pest control activities <input type="checkbox"/> Other – describe <p>I/we:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Apply chemicals to kill mosquito larvae (larvicide) <p>The larvicide I/we (or our pest controller) use is:</p> <p>I/we apply it to the following areas:</p> <p>The frequency that I/we apply larvicide/s is:</p>

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
<p>3.12 Control mosquitoes using chemical control (when and where required)?</p> <p>Refer to Controlling mosquitoes around piggeries</p> <p>Example records template</p>				<p><input type="checkbox"/> Apply residual chemical(s) to kill adult mosquitoes (adulticide) The residual adulticide(s) I/we (or our pest controller) use is:</p> <p>I/we apply adulticide(s) to the following areas:</p> <p>The frequency that I apply these chemical/s is:</p> <p><input type="checkbox"/> Fog with a chemical to kill adult mosquitoes The chemical I/we (or our pest controller) fog with is:</p> <p>I/we fog in the following areas:</p> <p>The frequency that I/we fog these areas is:</p> <p><input type="checkbox"/> Apply chemicals directly to pigs The chemical/s I/we apply directly to pigs are:</p> <p>The frequency that I/we apply these chemical/s is:</p>

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
4.0 Transport				
4.1 Keep records of pig movements into and out of the piggery?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The following details are recorded: <ul style="list-style-type: none"> <input type="checkbox"/> Date of purchase <input type="checkbox"/> PigPass serial number <input type="checkbox"/> Pig identification <input type="checkbox"/> Pig source <input type="checkbox"/> Record of treatments including medications, vaccines and other chemicals administered to the pigs purchased <input type="checkbox"/> Veterinary/other documentation relating to the new pigs' health status, and <input type="checkbox"/> How you managed them on arrival to ensure the risk of disease introduction was minimised (e.g., location and time period of isolation before entry) <input type="checkbox"/> Keep PigPass NVD records of all purchased pigs for 3 years <input type="checkbox"/> Upload all incoming pig movements into the PigPass database within 2 days
4.2 Brand or where applicable tag your pigs with an approved NLIS device prior to transport?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I identify my pigs prior to transport by: <ul style="list-style-type: none"> <input type="checkbox"/> Tattoo/brand <input type="checkbox"/> NLIS Ear tag
4.3 Have procedures for outgoing pigs to ensure they are fit to load and to minimise the risk that they will spread disease?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <ul style="list-style-type: none"> <input type="checkbox"/> Checking pigs prior to load out for signs of disease <input type="checkbox"/> Referring to the Fit for the intended journey guide <input type="checkbox"/> Assessing pigs as fit for the intended journey <input type="checkbox"/> Completing a PigPass NVD for all pig movements out of the piggery
4.4 Wash transport vehicles and allow them to dry between loads	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
4.5 Restrict external drivers to loading areas?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <ul style="list-style-type: none"> <input type="checkbox"/> Loading my own pigs <input type="checkbox"/> Transporting my own pigs <input type="checkbox"/> Employing a third party to move pigs and manage their access <input type="checkbox"/> Other – describe

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
5.0 Hygiene				
5.1 Recommend or require farm workers and family members to be vaccinated for influenza viruses seasonally	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
5.2 Ensure farm workers, family members and property residents are aware of the availability of Japanese encephalitis virus (JEV) vaccine, symptoms of Japanese encephalitis and how they can protect themselves from infection.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by: <ul style="list-style-type: none"> <input type="checkbox"/> Informing all workers, family members, property residents and regular contractors about the symptoms of JE in humans <input type="checkbox"/> Directing workers, family members and property residents to information and clinics for JE vaccination <input type="checkbox"/> Providing or encouraging the use of appropriate clothing and repellent use by workers, family members, property residents and regular contractors to protect themselves against mosquitoes (e.g., long-sleeved, loose fitting clothing, insect repellent) <input type="checkbox"/> Other – describe
5.3 Ensure staff or visitors that are sick with an infectious disease are not allowed in pig areas?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we do this by:
5.4 Keep a record of visitors to your operation and their previous pig contact	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	My visitor records include: <ul style="list-style-type: none"> <input type="checkbox"/> Date <input type="checkbox"/> Person's name and contact number <input type="checkbox"/> Vehicle registration number <input type="checkbox"/> Last contact with pigs (date, place) <input type="checkbox"/> Showered since last pig contact <input type="checkbox"/> Reason for visit and visiting pig areas

<p>5.5 Require visitors to wash their hands before/after entering pig areas?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>I/we do this by:</p>
<p>5.6 Provide or require visitors to change outerwear (e.g., coveralls) and footwear before/after entering pig areas?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>I/we do this by:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Piggery outerwear (clothing, coveralls) and boots are supplied <input type="checkbox"/> Boots and outerwear worn in the piggery do not leave the piggery <input type="checkbox"/> Other – describe
<p>5.7 Clean and where practical, disinfect any machinery or equipment before it enters and leaves your piggery?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>I/we do this by:</p>
<p>5.8 Have procedures in place to manage effluent dispersal to minimize disease and weed spread?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>Effluent and manure from this site is managed by -</p> <ul style="list-style-type: none"> <input type="checkbox"/> Collecting and hold on-site <input type="checkbox"/> Irrigating this property <input type="checkbox"/> Irrigating another property <input type="checkbox"/> Collecting and sell as fertiliser <input type="checkbox"/> Other – describe

Do you	Y	N	N/A	Detail your management practices – What DO YOU DO or if not doing it, what MIGHT YOU DO ?
6.0 Emergency Animal Disease (Ead) Management				
6.1 Make sure everyone on your farm or site knows to call your veterinarian or the Emergency Animal Disease (EAD) Watch Hotline if you observe unusual signs of disease in your pigs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>The EAD hotline number is – 1800 675 888</p> <p>I/we do this by:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Staff awareness of contact details <input type="checkbox"/> Written protocols or plans <input type="checkbox"/> Other – describe
6.2 Display pig emergency contacts openly for easy access?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Emergency contacts for this piggery are displayed in the following location/s:
6.3 Have the capacity to hold pigs if pig movements were not allowed?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>In considering housing, feed, water, stocking density and pig welfare, I/we might do this by:</p> <p>The maximum number of days that this piggery can adequately manage no pig movement is _____days/weeks</p>
6.4 Ensure you or your staff have the knowledge and experience to humanely euthanise pigs on-site if required?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I/we might do this by:
6.5 Have a system for disposing of carcasses if and when required?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>I/we might do this by:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Deep burial <input type="checkbox"/> Incineration <input type="checkbox"/> Composting <input type="checkbox"/> Delivery to the local licensed landfill <input type="checkbox"/> Other – describe

My top 3 biosecurity priorities to work on are:

1. _____
2. _____
3. _____

Next plan review date: _____

Plans should be reviewed at least every 12 months

Optional: Veterinary authorisation

Veterinarian name and registration number: _____

Date: _____ Signature: _____
