Biosecurity equals food security 🍷 🍌 🍋 🍌

From farm to fork, every meal starts long before food reaches our plate. By planning ahead, building capability and working together to detect and respond to plant biosecurity threats early, we all help to protect the crops that feed Australia.

This #BioWeekAU, take a moment to learn how preparedness strengthens Australia’s resilience and helps safeguard our food supply.

When it comes to biosecurity, being prepared today helps protect tomorrow’s harvest.

Biosecurity equals food security 🍷 🐄 🐑 🐔

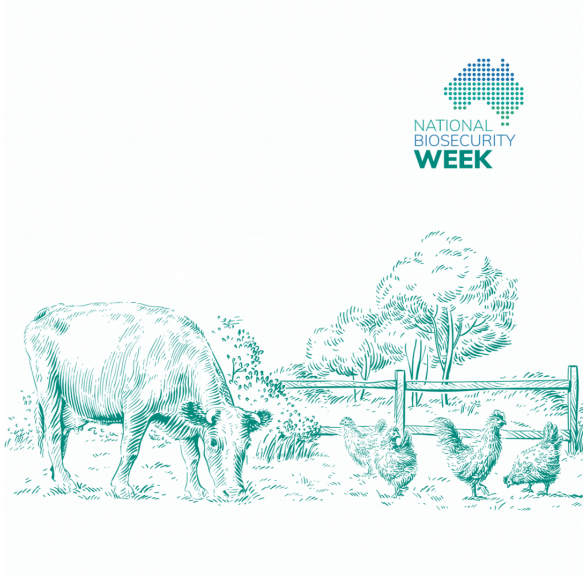

From paddock to plate, every meal starts with preparedness, prevention and protection. By working together to detect and respond to animal disease threats early, we all help to protect the livestock industries that feed Australia.

This #BioWeekAU, take a moment to learn how preparedness strengthens Australia’s resilience and helps safeguard our food supply.

When it comes to biosecurity, being prepared today helps protect tomorrow’s herds and flocks.

Biosecurity equals food security 🌊🐟🦀🐚

From sea to supper, your favourite seafood meal starts with preparedness, prevention and protection. By working together to detect and respond to marine pests, diseases and other biosecurity threats early, we help protect the seafood that is part of our way of life – from backyard barbeques to fish and chip nights.

This [#BioWeekAU](#), take a moment to learn how preparedness strengthens Australia’s resilience and helps safeguard our food supply.

When it comes to biosecurity, being prepared today helps protect tomorrow’s catch.

Biosecurity equals food security 🌱🐝🐝🐝

From bloom to bounty, every meal starts long before food reaches our plate with preparedness, prevention and protection. By working together to detect and respond to bee pests, diseases and other biosecurity threats early, we help protect the pollinators that support many of the foods Australian’s enjoy every day. Bees play a vital role in food production, with nearly two-thirds of Australia’s agricultural production benefiting from bee pollination.

This [#BioWeekAU](#), take a moment to learn how preparedness strengthens Australia’s resilience and helps safeguard our food supply.

When it comes to biosecurity, protecting our bees today, helps secure tomorrow’s harvests.

Biosecurity equals environmental security 🌐 🌳 🌲

From plantations to parks, every healthy landscape begins with preparedness, prevention and protection. By working together to detect and respond to tree pests, diseases and other biosecurity threats early, we help protect our native trees, forests, green spaces and plantation resources that support our environment, communities and economy.

This [#BioWeekAU](#), take a moment to learn how preparedness strengthens Australia’s resilience and helps safeguard our trees.

When it comes to biosecurity, preparedness today helps preserve the forests, parks and green spaces Australian’s cherish.

One Country. One Health.

From the food on your plate to the people, animals, plants and places you love, biosecurity helps protects what matters.

Healthy environments, thriving industries and resilient communities are all connected. That’s why biosecurity is a shared responsibility. By staying informed, being prepared and knowing what to look for, we can all help prevent and detect biosecurity threats.

This [#BioWeekAU](#), learn how you can play your part in protecting Australia’s future. Because it takes every one of us to protect Australia.

Think biosecurity isn't your job? Think again.
Whether you're launching the boat before sunrise, casting a line off the jetty, or heading to your favourite fishing spot, your actions matter.

- ✔ Clean your boat, trailer and fishing gear
- ✔ Choose locally sourced bait
- ✔ Check and report anything unusual

It doesn't take a badge to protect Australia's waterways, fisheries and fishing lifestyle. Just a little awareness and a few simple actions. 🇦🇺 🚤 🐟

👉 Learn how you can help at bioweek.org.au

🌱 Spotted something unusual in your garden?

🇦🇺 Early detection of pests and diseases is the first line of defence for your patch and the whole country.

Whether you grow herbs on a balcony, tend a veggie plot, or run a small farm, biosecurity starts with you.

- 👁️ Keep an eye out
- 📷 Report what you see
- 🌱 Protect what you grow

This National Biosecurity Week, find out how you can help: bioweek.org.au

📦 Working in freight, logistics or warehousing? Every shipment, pallet and package plays a role in Australia's biosecurity.

Pests and diseases can hitchhike on goods, packaging and equipment, putting our farms, environment and economy at risk.

- 🔴 Know the biosecurity risks
- ✅ Check and choose trusted suppliers
- 📦 Stay alert and report anything suspicious

Because strong logistics and supply chains help keep pests and diseases out and Australia moving: bioweek.org.au
